

So Many Languages

- Team YAAS

Ever feel like learning a
new programming
language?

Need to convert one
language's code
to another?

Our Advantage

- Smart technology
- Immediate language conversion
- One of its kind language freedom
- Voice to code templating
- Easy to use
- Accurate coding
- Logic based approach
- Save time

- Students,
Learning has no age

LIMITLESS

Our Audience

Our Potential

Business Model

- Free code templating and conversion for particular common languages like C++, Python, Java, etc
- Paid packs for exclusive languages like Swift, PHP, JavaScript, etc

Marketing

- For every referral, points earned which help purchase premium and exclusive language packs
- Schwags and discount benefits for Campus Ambassadors

Convert Codes

SO MANY
LANGUAGES

Hello There!

- Rewards

So Many Languages

Convert a programming language's code to another accurately within seconds.

Choose desired language: **Python**

```
#include <iostream>
using namespace std;
int main()
{
    int n,a,b,answer;
    cin>>a;
    cin>>b;
    answer = a+b;
    cout<<answer;
    return 0;
```

```
a= input()
b= input()
answer = a+b
print(answer)
```

SO MANY LANGUAGES

User: add two numbers for me

```
1. python running!
```

```
1. def add(a,b):
2.     return a+b
3. x=int(input())
4. y=int(input())
5. ans=add(x,y)
6. print(ans)
```

 speak your query :)

Change Language!

code.py

```
1 a= int(input())
2 b= int(input())
3 answer = a+b
4 print(answer)
```

<output>

show stdin Python 3 (python 3.5.3) load RUN

clear output on each new submission
